

# Certificate ClimateNEUTRAL Website

[www.juiceplus.com](http://www.juiceplus.com)

the „The Juice PLUS+® Company Europe“ has been awarded the „ClimateNEUTRAL Website“ status and seal of approval.

On the basis of our analyses, the corresponding number of trees have been planted to offset the emissions generated by the website. This also includes the website hosting and the number of „clicks“ from website visitors.

The newly planted trees protect our environment, improve the climate and provide protection and habitat for animals and local people. Fruit trees also provide food and only the local people are employed in the nurseries. This creates jobs and training opportunities for both the parents and their children. That is sustainability.

Working together for a greener and better world.
